

**National Interagency Coordination Center
Incident Management Situation Report
Friday, February 21, 2014 – 0800 MT
National Preparedness Level 1**

National Fire Activity (Weekly Total)

Initial attack activity: Light (371 new fires)
 New large fires: 7 (*)
 Large fires contained: 5
 Uncontained large fires: ** 2
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 1)

New fires: 312
 New large fires: 4
 Uncontained large fires: 2

* **Mustang**, Osage Agency, BIA. Started on private land 30 miles north of Tulsa, OK. Grass and timber litter. Running fire. Structures threatened.

* **Tupelo**, Francis Marion & Sumter NF. Two miles northeast of McClellanville, SC. Timber and hardwood litter. Running fire. Residences threatened.

Predictive Services Discussion: For the latest daily weather forecast, please consult the National Weather Service graphical forecasts for the U.S. at: <http://graphical.weather.gov/sectors/conusWeek.php#tabs>

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR

Weather / Fire Behavior Category

[Scenario](#) (Interactive Cloud Poster: loads slow)

- Ask questions of local experts! What kinds of questions would you ask?
- Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?
- Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?
- Is there any other way to obtain information? List common sources of information on weather and local factors (Examples: Web based weather Activity Planner, Point Forecast Matrix, NOAA Internet Briefing)
- To reduce risks:
 - Base all actions on current and expected fire behavior.
 - Post lookouts.
 - Establish escape routes and safety zones.
 - Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things—southeast or Alaska).
 - Recognize and report visual indicators (clouds, WX obs., cold front passage, inversion breaking)
